1. East of Güstrow, on the railway line Güstrow - Primaburg - Nienhagen - Neubrandenburg, are the buildings of the former Primaburg Ammunition Dump which have been under repair and reconstruction since mid-1948. At present there are some 400 German workmen from the Güstrow area employed there. The area has been closed to civilians.
2. The buildings consist of a complex of large sheds (Hallen), which for the most part have been destroyed, and a number of smaller buildings which are protected by a small forest. The entire complex is now being planned with concrete roads. The installation is to be connected to the railway station at Primaburg by a branch line.
3. Workmen employed on the project speak quite openly of constructing an "ammunition factory" (sic).
